# Twill Care profile creation page test results report

## Description

20 tests were developed. The tests were carried out in 4 different browsers (Chrome, Firefox, Opera, and Edge). Black box testing was applied. Techniques such as equivalence partitioning, boundary value analysis, and exploratory testing were used in the test development process.

The purpose of testing was to check the correct work of the profile creation page functionality in all modern browsers.
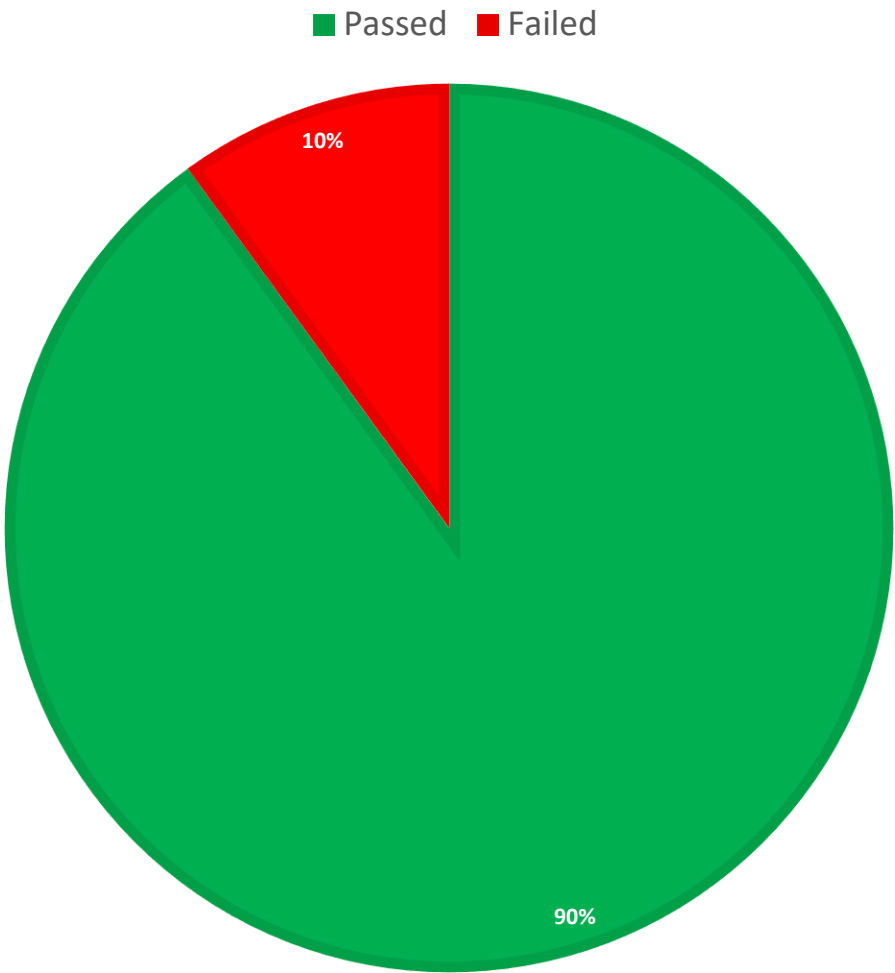

Team: Roman Topilin.

## Test progress information

Table 1 - Test cases passed during the page testing https://care.twill.health/personal-data/

| Test case № | Test name (Description) | Test status in each browser | | | |
|---|---|---|---|---|---|
| | | Chrome 106.0.5249.119 (64-bit) | Firefox 106.0.1 (64-bit) | Opera 92.0.4561.21 (64-bit) | Edge 106.0.1370.47 (64-bit) |
| 1 | Filling in all fields of the profile creation page form with the correct data and with the gender selection "Female" | Passed | Passed | Passed | Passed |
